Mike,

Our contractor will segregate costs for the PFC sampling activities under a separate code.

Importance: High

Debbie, the wells you specified are in our monitoring plan for October, including the UPA-designated wells. I think the most expeditious approach would be for Golder to purge the wells in association with our sampling, then allow CDM to pull the samples you want. That way, we will provide the purging, and also manage the purge water along with our IDW. We can have Aaron and Theresa work together to coordinate scheduling as the time approaches.

Also, counsel for the Trust respectfully requests that EPA track the costs for this sampling effort separately from the normal oversight costs incurred by EPA at this Site.

Please call with any questions.

Mike

Subject: DS&G - upcoming October semi-annual groundwater monitoring event

Mike,

I would like CDM to collect groundwater samples for analysis for perfluorinated compounds since the Trust has declined to perform this analysis. We would like to collect samples from selected transition zone monitoring wells (DDA-06 and DDA-16-TZ) and one or two UPA wells during the upcoming semi-annual monitoring event. The transition zone wells we plan to sample may not be included in the Trust's semi-annual monitoring program. Please let me know if this is the case. If so, please let me know if CDM will need to make arrangements for purging and sampling the wells, managing IDW, etc.

Thanks.

Debbie
